

Environmentally Speaking

Buy, Save, Build Green

With the National Furniture Center and Our Quality Commercial Partners

The National Furniture Center provides more green furniture and furnishings on GSA contract than most people realize. Our suppliers, all the best known names in the industry, have put their innovative corporate resources to work to provide environmentally sensitive products from floor to ceiling.

Innovation and resourcefulness are hallmarks of GSA's green products. Milliken Carpets, winner of GSA's first Evergreen Award, takes back used carpet tile, cleans and rejuvenates it, and overprints a new pattern for reuse. Equally noteworthy are carpets from Talisman and Collins & Aikman. Talisman Mills uses 36, 2-liter soda bottles for every square yard of its recycled content carpet. Using this method, Talisman prevents an estimated 40 million pounds of waste from entering landfills each year. For recyclable/recycled content vinyl backed carpet, Collins & Aikman uses reclaimed carpet to create vinyl backing for their carpet – which can then be reclaimed at the end of its life cycle and again re-manufactured into backing for new carpet – thus creating a continuous loop of recycling.

GSA customers can also save thousands of budget dollars with office workstations in which pre-owned systems panels and components are re-manufactured to “like new” condition by several of our quality commercial partners. After buying remanufactured systems furniture, customers continue being green by using any of a number of GSA's green lighting alternatives.

File Storage Box

GSA File Storage Boxes (also called “Banker’s Boxes”) are the necessary ingredient in any office’s efficient filing system. All stored files and archives must be kept in neat order, be readily accessible, easily stackable, and use a minimum amount of space. All these attributes can be found in GSA's sturdy storage file boxes that are easily assembled and easily stored. They feature sturdy, stackable, double wall corrugated fiberboard construction, an off-white easy-write-on-surface, and contain 30% post consumer material (PCM).

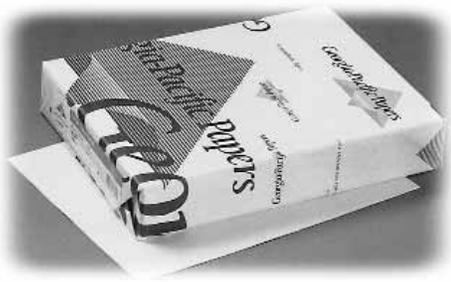

NSN: 7520-01-349-8776
Description: Lift-off lid, tote holes and large labeling area. For letter size documents and files.
Size: 12” wide, 15” deep, 10” high
U/I: DZ
Price: \$20.16

Name Brand Copier Paper Meets Recycling EO Requirements

Buyers of brand name Copier Paper — recently made available by GSA, under Federal Supply Schedule 75, Part XI, SIN 466-14 — will be pleased to learn that it now contains 30% postconsumer material content (PCM). This places users in complete compliance with Executive Order 13101 on recycling.

This recycled copier paper comes from the top paper mills in the country: Champion, James River, Georgia Pacific, Hammermill, Springhill, Boise Cascade, Xerox (limited quantities, only), Union Camp.

The paper is standard 8-1/2" x 11" and 8-1/2" x 14" #20 bond with 30% postconsumer material (PCM) content. It is competitively priced compared to private sector retailers and includes sliding scale discounts. Note, however, you will find that small quantities may be less competitive in price.

Although paper from these mills has always been available from GSA stock, specifying these brands has not been possible until now. The contractors are:

Paper Corporation of United States (Contract# GS-15F-1110H)

Offering Unisource Copysaver, Champion Multi-purpose Recycle, Georgia Pacific Geocycle, Husky Recycled Xerocopy DP, Springhill Recycled Relay DP, Hammermill Savings DP, Willamette Willcopy Recycled, and Boise Cascade Aspen Recycled. Contact: Ray Darmstadt, (212) 337-5521.

Innovative Sales Brokers (Contract# GS-15F-1430H)

Offering Georgia Pacific Geocycle, and Xerox (Limited availability). Contact: Gerald Legins and Gloria Schumacher, (800) 283-1903.

Precision Transport (Contract No. GS-15F-1434H)

Offering Xerox (Limited availability). Contact: John L. Wright, (415) 822-1550.

XPEDX (Contract# GS-15F-1446H)

Offering Hammermill Savings DP, James River Eureka, Georgia Pacific Geocycle, and Union Camp Great White. Contact: Carmel Flanagan (212) 863-1673.

Ansley Business Materials of Chicago (Contract# GS-15F-9507C)

Offering Xerox Brand, Star, Domtar Windsor, Hammermill Savings DP, Georgia Pacific Geocycle, and Boise Cascade Neon Brite (Colors: Green, Pink, Blue and Yellow) Contact: Laura Rivera (312) 666-4070, X 105.

Xerox Corporation (Contract# GS-15F-9537C)

Offering Xerox Brand, Contact: J. David Goons, (703) 442-8855.

PaperSource, Inc. (Contract# GS-15F-0014J)

Offering Domtar Windsor and Springhill Recycled. Contact: Blake Nelson, (843) 899-4141

Blaisdell's (Contract# GS-15F-0018J)

Offering Union Camp Great White. Contact: Fred Shelton. (510) 483-3600, X 106

Bunch-Bey Corporation (Contract# GS-15F-0020J)

Offering Union Camp Great White. Contact: Darlene Montgomery (202) 636-3568.

Williamette Industries, Inc. (Contract# GS-15F-0032F)

Offering Williamette Willcopy Copier Paper. Contact: Tom Jeske (800) 220-8062.

For best results during the warmer months, paper manufacturers recommend that all copier paper — regardless of the source — be acclimated to the atmosphere (temperature and humidity) of the room in which it is to be used for about 24 hours prior to installing by simply opening the carton.

For details, order Federal Supply Schedule 75, Part XI from:
The Centralized Mailing List Service (CMLS)
P.O. Box 6477
Ft. Worth, TX 76115
Phone (817) 334-5215
Fax (817) 334-5227

GSA Contact: Robert Woodside
Phone: (212) 264-4170
E-Mail: robert.woodside@gsa.gov

Xerox Brand Copier Paper Now in Stock

XEROX Brand Copier Paper goes green with GSA. With the addition of Xerox brand at the premium grade level and with a full contingent of colored papers, the GSA Recycled Copier Paper family is now in complete compliance with President's Executive Order 13101. The stricter and greener Executive Order (EO), issued October, 1998, requires that all copier paper contain 30% postconsumer material (PCM).

GSA now has compliant recycled copier paper in every size, color and at every price level. Best of all, your purchase places your agency in complete compliance with the recycling EO. As one of the country's major proponents of the use of recycled copier paper, GSA has proactively moved the industry to provide the product in sufficient quantity so Federal agencies can comply with the new tougher regulations.

GSA sells recycled copier paper only, because it is so confident about its high quality. In addition to the Xerox brand paper, GSA's other recycled copier papers are manufactured in the same mills that make the name brands you've always used and relied on. And they give our recycled paper the same attention to quality that they've always given the best papers they manufacture.

In countless tests – as recently as last April – recycled paper has had no problem matching up to non-compliant copier paper. GSA copier paper has been equal in appearance, had fewer contaminants, and measured thicker than the non-compliant paper – and that means fewer jams. It meets all Government Printing Office (GPO) printing standards.

GSA recycled copier paper is a multi-purpose paper. It runs well in desktop or high speed copiers, plain paper fax machines, ink jet printers, and laser printers – even manual and electric typewriters – so that you'll be saving on inventory and storage space.

Note: For best results during the warmer months, paper manufacturers recommend that all copier paper – regardless of brand – be acclimated to the atmosphere (temperature and humidity) of the room in which it is to be used for about 24 hours prior to use by simply opening the carton.

This is an opportunity to help protect the environment, save needed landfill space and preserve forestland, without sacrificing the quality and reliability your agency needs – and at the same time preserve your budget.

You can order by using FEDSTRIP/MILSTRIP, MUFFIN or by using **GSA Advantage[™]**, our on-line shopping service at: <http://www.fss.gsa.gov>

GSA Computer Paper

Are you looking for quality, performance, value, availability and service? Then look no further than GSA.

Our recycled computer paper is quality paper you can depend on, offering users clear, sharp printing; paper that flows smoothly through printers, and folds and trims neatly, thanks to its sharply die-cut mini-perforated sprocket-hole carrier strip. Below are listed some of the more popular papers from our extensive line.

The white carbonless chemically-coated paper is landscape-oriented, size, 14-7/8" x 11" and has vertical margin perforations 1/2" from left and right sides. It has a 12-15 lb. basis and comes in 2-, 3-, 4-, 5- and 6-part sets.

The white carbonless flat fold computer paper is chemically-coated for use in impact-type printers, is portrait-oriented, measures 9-1/2" x 11" and has vertical margin perforations 1/2" from left and right sides. Comes in single, 2-, 3-, 4-, and 5-part sets.

In addition, GSA Computer Paper is environmentally-beneficial because it contains a minimum of 30% postconsumer material (PCM), placing all users in complete compliance with the President's Executive Order 13101 on recycling.

Packaging Needs for U.S.P.S. Retail Program

The Christmas shopping season is in full swing, which means that this is the time for all Postmasters to be sure that they have ample inventory of Christmas Packaging for U.S.P.S. Retail Program sales to meet the upcoming busy season. GSA has a full line of shipping aids and practical packaging that all customers need to properly protect contents in shipping and assure their safe travel.

Conveniently low Units of Issue (U/Is) mean lower inventories and less investment, while the high postconsumer material (PCM) content assures compliance with all recycling requirements.

White Corrugated Boxes For all Kinds of Gifts

United Freight Classification (UFC) and National Motor Freight Classification (NMFC) strength rating of 200 lbs./in. max. Total weight, 65 lbs. Contain 40% PCM content. Popular sizes for all kinds of gifts.

Computer Copyholders

Work on the keyboard flows easier and faster when users can look at these GSA copyholders. GSA has a wide variety to offer: side-by-side, hook-on and folding types. Choose the one that's most comfortable, creates the least neck strain, and is easiest-to-read from.

NSN: 7520-01-443-4902
Description: VuWryte® Workstation, includes a clear plastic front-reading document holder and tiered terminal pedestal.
Features: Raises and lowers terminal to comfortable eye level. *Made under JWOD by non-profit agencies affiliated with NIB.*
Color: Beige
U/I: EA
Price: 103.41

You can order by using FEDSTRIP/MILSTRIP, MUFFIN, GSA Advantage!TM, our on-line shopping service at: <http://www.fss.gsa.gov>, or call the Customer Supply Center on (800) 525-8027.

Contact: Andre Lovell (Technical)
Phone: (212) 264-8734
E-Mail: andre.lovell@gsa.gov

Contact: Jeffrey Fleisher (Inventory)
Phone: (212) 264-5197
E-Mail: jeffrey.fleisher@gsa.gov

Paper Towels

You need good absorbent paper towels on hand that are cost-effective and that fit most dispensers. These are just a sample of what we have available.

NSN: 8540-00-262-7178
Description: C-Fold Paper Towel; Heavyweight, Fold, 4" deep, for Dispenser:
NSN 4510-00-585-6305. Contains 40% PCM.
Size: 130 sq. in.
U/I: BX (2400)
Price: \$15.79

NSN: 8540-01-055-6134*
Description: C-Fold Paper Towel; Heavyweight, Fold, 4" deep, for Dispenser
NSN 4510-00-585-6305, Contains 40% PCM.
Size: 130 sq. in.
U/I: BX (2400)
Price: \$41.07

NSN: 8540-00-291-0389
Description: C-Fold Paper Towel; Heavyweight, Fold, 4" deep, for Dispenser
NSN 4510-00-585-6305. Contains 40% PCM.
Size: 130 sq. in.
U/I: BX (2400)
Price: \$15.13

* Made under JWOD by non-profit agencies affiliated with NIB.

Order through FEDSTRIP/MILSTRIP or MUFFIN procedures.

Contact: David St. Louis
Phone: (212) 264 3537
E-Mail: david.stlouis@gsa.gov

Toilet Tissue

Two-ply tissue comes in uncompressed rolls. Consists of perforated sheets wound around a core.

NSN: 8540-01-380-0690*
Description: Toilet Tissue, Double Ply, 2,250 ft. long.
Contains 30% PCM.
U/I: BX (96 RO)
Price: \$44.97

One-ply toilet tissue:

NSN: 8540-01-055-6094*
Description: Toilet Tissue, Single Ply, 4,500' long, white.
Contains 30% PCM.
U/I: BX (48 RO). Packed in waterproof containers
for the U.S. Navy and U.S. Forest Service.
Price: \$36.08

NSN: 8540-00-530-3770
Description: Toilet Tissue. Single-ply uncompressed rolls.
White. Contains 30% PCM.
Size: 4500" long
U/I: BX (96 EA)
Price: \$48.69

NSN: 8540-01-359-0764
Description: Toilet Tissue Single-ply uncompressed rolls.
Unbleached. Contains 90% PCM.
Size: 4500" long
U/I: BX (96 RO)
Price: \$67.38

One-ply tissue, unperforated:

NSN: 8540-01-378-6218
Description: Toilet Tissue Single-ply, white, uncompressed
rolls. Jumbo size.
Size: 4500" long
U/I: BX (6 RO)
Price: \$42.21

The NSNs marked with an asterisk (*) are manufactured under JWOD by agencies affiliated with the National Industries for the Blind (NIB).

Greening the Government through Efficient Energy Management

Federal Supply Schedule 62 II

Solar Energy Systems and Energy Saving Lighting Products

From Executive Order 13123, Section 101:

“The Federal Government, as the nation’s largest energy consumer, shall significantly improve its energy management in order to save taxpayer dollars and reduce emissions that contribute to air pollution and global climate change. With more than 500,000 buildings, the Federal Government can lead the nation in energy efficient building design, construction, and operation. As a major consumer that spends \$200 billion annually on products and services, the Federal Government can promote energy efficiency, water conservation, and the use of renewable energy products, and help foster markets for emerging technologies. In encouraging effective energy management in the Federal Government, this order builds on work begun under EPACT and previous Executive Orders.”

GSA’s Federal Supply Schedule 62 II, Solar Energy Systems and Energy Saving Lighting Products, has a variety of contractors that can be used to meet the goals mentioned in Executive Order 13123. Our energy-efficient products include solar outdoor lighting, solar water pumps and heaters, fluorescent lighting fixtures, fluorescent lighting reflectors, lighting sensor systems, energy saving lighting ballasts, low pressure sodium lighting fixtures, high pressure sodium and metal halide lighting fixtures, airport lighting, and tubular sky lights.

The products on this schedule can provide many ways to reduce energy consumption for the innovative user. For example, an Army installation cut energy consumption by installing solar lighting in parking areas near troop barracks. This initiative not only reduced energy use, but also saved on construction cost by eliminating the necessity to tear up and resurface parking lots after installing underground wiring (WACO News article by Richard L. Smith).

To download your copy of the latest schedule, go to www.gsa.gov/regions/7fss/7fx/schedules or Schedules-E-Library at pub.fss.gsa.gov.

NEWS FLASH

Partnering for Customer Satisfaction...UNICOR and QFMA

The Federal Prison Industries, Inc. (UNICOR) and the Quarters Furniture Manufacturers Association (QFMA) have reached a significant agreement establishing a pilot program whereby UNICOR will waive its mandatory source status for all purchases of dormitory and quarters furniture, including packaged room applications. This agreement is effective January 1, 2000, and covers orders placed on or after that date for Federal Supply Class 7105.

This pilot program will allow all Federal government dorm and quarters furniture buyers to purchase dormitory and quarters furniture from any of our GSA Schedule suppliers without obtaining a waiver from UNICOR for the duration of the pilot. The pilot program runs through Fiscal Year 2005.

Any questions about the pilot program can be directed to Carole Snider, President, Quarters Furniture Manufacturers Association (336-476-2175), Steve Schwalb, Chief Operating Officer, Federal Prison Industries, Inc. (202-305-3501)

New Product Available under Federal Supply Schedule 46 I

Water Filtration Systems

Global Water Technologies

Model LS3 - M2500S, a self-contained, dolly-mounted system that produces 2,500 gallons per day, with a solar array to recharge the 12V battery system.

Model LS3 - M15000, a self-contained trailered system that produces up to 20,000 gallons per day.

Global's Military and Disaster Relief model LS3- M15000 produces potable water from any contaminated fresh water sources up to 20,000 gallons per day. These two units, pictured above, are owned and operated by the 202 Red Horse Squadron of the Florida National Guard. These units were successfully deployed after hurricanes Opal, Fran, Georges, and Mitch.

LS3 - DESAL - M600GPH with All-Weather Housing and Trailer Built for the Turkish Navy.

Global's Military and Disaster Relief model LS3-DESAL-M600GPH produces potable water from seawater at 600 gallons per hour or up to 1,200 gallons per hour from fresh water sources. This unit (above), which was delivered to the Turkish Navy, includes an all-weather housing which can be heated or air-conditioned, is fully insulated, and can run during all types of adverse weather conditions. The unit is uniquely designed to run in four separate modes to maximize the efficiency and life of the system and its filtering processes. The desalination system will handle up to 50,000 ppm. This unit was delivered with a customized trailer for ease in mobility. However, the M600GPH is also easily moved by helicopter, can be placed on the back of a flatbed trailer, or can be fixed in place on its own platform. Other mobile military desalination and fresh water models produce 75 gph, 250 gph, 1200 gph, 3000 gph and 4200 gph.

Federal Supply Schedule 23 Part I Wheel and Track Vehicles

Clary Equipment's Global Electric MotorCar

The Global Electric MotorCar (GEM) is a multi-purpose electric car and utility vehicle currently offered by Clary Equipment and Leasing, Inc., through Federal Supply Schedule 23, Part I.

The GEM comes in a variety of styles: two and four passenger utility vehicles and/or short and long bed utility vehicles. The GEM already comes in five colors and special provisions have been made to provide government agencies with custom colors.

The GEM is capable of road speeds of 22 - 25 mph and can sustain a charge for up to 50 miles. These units are also equipped with a 'TURF' mode, which reduces the vehicle speed to 10 - 12 mph for travel in congested areas and on golf courses. The GEM recharges on standard 110 household current and can be left plugged in indefinitely when not in use. These vehicles come with optional swivel, golf and utility packs and there are a variety of options including vinyl weather chaps and AM/FM Radio Cassette Players.

The GEM complies with all safety standards established by the Department of Transportation for street use in most states.

Federal Supply Schedule 68 V B Chemicals & Chemical Products

Superior Non-Chemical Industrial/Commercial Magnetic Water Treatment Systems

“The Cost Effective and Environmentally Safe Alternative”

Superior Water Conditioners meet all requirements for effective water treatment for control of lime/scale for thermal transfer efficiency in boilers, cooling towers, and heat exchangers.

It is estimated that the life-cycle cost of chemical water treatment is a staggering factor of seven times the original acquisition cost of the treatment chemicals!!!

Proven advantages of installing the Superior Water Conditioner includes pollution prevention, energy saving, scale reduction, improvement of heat transfer, conservation of water, front-end pollution prevention, better corrosion control, less downtime and labor requirements, and hazardous waste cost elimination.

The Federal Technology Alert, “Non-Chemical Technologies for Scale and Hardness Control,” sponsored by the Department of Energy and published in

1998, indicates a payback of less than 1 year and an adjusted internal rate of return greater than 50% for water treatment systems such as Superior’s. Non-chemical water treatment technologies were calculated and judged life-cycle cost-effective (at one or more Federal sites) in terms of installation cost, net present value, and energy savings.

The Superior Water Conditioner will aid government facilities in complying with the Executive Order #12902 dated March 8, 1994 (Energy Efficiency and Water Conservation at Federal Facilities).

Federal Supply Schedule 49 II Maintenance, Repair Shop Equipment and Cleaning Equipment

Muck Munching Microbes New Bio-remediation Process in Parts Cleaners Reduces Hazardous Waste Production

Article by Marla Jones, Deputy Public Affairs Office, US Army, Fort Gordon

The SmartWasher is used to clean a sprayer with Ozzy Juice™ instead of hazardous solvents at Fort Gordon.

Grease gobbling microbes will replace solvent solutions soon at Fort Gordon Maintenance shops. "We submitted a purchase request for a bioremediating parts cleaner system called the SmartWasher," said Leigh Banks, an Environmental Support Specialist for the Environmental and Natural Resource Management office. SmartWasher is a trademark name for the system made by the ChemFree Corporation of Norcross, Georgia.

Banks said Fort Gordon has requested 47 of the washers to replace the cleaning systems presently in use, a parts washer that uses a solvent to rid parts of grease. "Purchasing these SmartWashers will decrease the amount of hazardous waste generated at Fort Gordon, the amount of hazardous materials in our inventory, air emissions and health and safety risks to workers," Banks said. Directorate of Public Works has ordered two types of SmartWashers parts cleaners and brake and clutch cleaners. She received information on the system from a colleague while they were both at a training class. Banks sought more information, and arranged for a lease of two SmartWashers so Fort Gordon could try them out. "We looked at other technologies, but this system was preferable."

The tryout was positive. Jim Kaefer, Supervisor, Tactical Vehicle Maintenance, said, "The folks using them have had nothing but good things to say." He added that the solutions are more "user friendly" than solvents. The cleaning solution has a pleasant lemon-like odor. Banks said after 1 week the employees in special purposes workshop reported they really loved the SmartWashers.

The solution is a water-based substance that detached the grease or paint from the part or equipment. The solution goes through a filter, and the microbes are embedded in the filter; as soon as the microbes are activated with heat, they consume the grease. ChemFree calls the microbe "Ozzy," a patented trademark of the company.

The washer keeps the solution and filter at a constant 105 degrees; the Ozzies thrive in that warm environment. When they are given nutrients, or grease, they reproduce at a more rapid rate, and they eat more, Banks said. Filters are changed once a month; depending on the concentration of accumulated wastes, these may require special disposal. The solution does not need to be changed, only more added as necessary. Steve Willard, Chief, Environmental and Natural Resource Management, estimates the Post will receive a return on its investment in about 18 months. "That means \$27,200 saved annually after the initial year and a half." This simple system replaces one in which Fort Gordon paid to dispose of 8,183 gallons of solvent from parts cleaning equipment during 1996. "It works!" Kaefer said. "We're glad that it is environmentally safe, and yet it cleans the parts as well."
